Mr. Royce Ramsey
Vice President of Operations
Northern Natural Gas Company
1111 South 103rd Street
Omaha, Nebraska 68124

Ref: PHMSA-2008-0141
Special Permit Renewal from April 15, 2015 to April 15, 2020

Dear Mr. Ramsey:

By letter dated August 14, 2014, the Pipeline and Hazardous Materials Safety Administration (PHMSA), Office of Pipeline Safety (OPS) notified Northern Natural Gas Company (Northern) that special permit (PHMSA-2008-0141) would expire on April 15, 2015, unless renewed. By letter dated October 3, 2014, and supplemented by additional correspondence, Northern applied for the renewal of the special permit, PHMSA-2008-0141, and provided operational documents to justify the special permit renewal. On February 4, 2015, PHMSA published a Federal Register notice announcing the renewal request (80 FR 6174). No public comments were received.

The special permit segment is approximately two (2) miles long and is on the Northern 14-inch Sioux Falls (Nebraska to South Dakota Mainline - SDM90201) natural gas transmission pipeline located in the city of Harrisburg in Lincoln County, South Dakota. This special permit allows for the non-odorization of natural gas in a pipeline that is normally required to be odorized in accordance with 49 CFR § 192.625(b)(1).

The special permit renewal request letter and all other pertinent documents are available for review in Docket No. PHMSA-2008-0141 in the Federal Docket Management System (FDMS) located at www.regulations.gov.

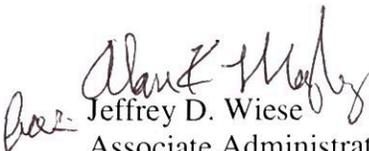

PHMSA reviewed all operational, maintenance, and environmental assessment data submitted by Northern for the 14-inch Sioux Falls (Nebraska to South Dakota Mainline - SDM90201) natural gas transmission pipeline special permit renewal. PHMSA finds that Northern continues to meet the terms of the special permit and there has been no material change in conditions. Based on the information provided by Northern, PHMSA has determined that renewal of the special permit would not be inconsistent with pipeline safety.

APR 07 2015

Accordingly, by this Order, and as described in the original special permit, PHMSA grants Northern Natural Gas Company a special permit renewal for PHMSA-2008-0141, to operate the Northern 14-inch Sioux Falls (Nebraska to South Dakota Mainline - SDM90201) natural gas transmission pipeline located in the city of Harrisburg in Lincoln County, South Dakota, from April 15, 2015, through April 15, 2020. This special permit renewal Order waives compliance with 49 CFR § 192.625(b)(1) for the Northern 14-inch Sioux Falls (Nebraska to South Dakota Mainline - SDM90201) natural gas transmission pipeline.

My staff would be pleased to discuss this special permit or any other regulatory matter with you. Mr. John Gale, Director, Division of Standards and Rulemaking, may be contacted at 202-366-0434 on regulatory matters, Mr. Ken Lee, Director, Engineering and Research Division, may be contacted at 202-366-2694 on technical matters, and Mr. Allan Beshore, Director, OPS, Central Region, may be contacted at 816-329-3811, for operational matters specific to this special permit renewal.

Sincerely,

Jeffrey D. Wiese
Associate Administrator for Pipeline Safety
